ORBYTE SMART SME CHALLENGE · DOMAIN 2

ESG Passport

Get ready before your customer asks.

Kopi-Paste Coders

Team leader: Lee Boon Yew

Members: Wee Lik Hui · Imam Mahdi Ali Ang Attuko · Yap Li Yang

Problem

Suppliers will be asked for ESG data they can’t find

Records lost in bills and phone photos

Every customer asks differently

No answer can cost the contract

Today, one questionnaire means days of digging and guessing.

Target User

Small suppliers to large companies

Who they are

- Micro and small Malaysian SMEs
- Supplying listed or large companies
- Records on WhatsApp, paper and Excel
- No sustainability staff

Who uses the app

Owner · approves and shares

Admin clerk · records the bills

Customer · views the approved pack

Why Now

Big companies must report, so they'll ask suppliers

2025

Largest Main Market companies

2026

All other Main Market companies

2027

ACE Market and large non-listed firms

From about 2027: supply-chain (Scope 3) emissions

SMEs have no legal duty, but their customers will ask.

Solution

One ESG profile, shared on your terms

EVERY MONTH

1 · Get ready

- AI reads bills, a person confirms
- Rules calculate SEDG metrics
- See what’s missing

WHEN A CUSTOMER ASKS

2 · Answer

- Match questions to SEDG (EN/BM)
- Fill answers with evidence
- Owner approves and shares

Fill once, share many.

How It Works

From customer question to approved pack

1 · Trigger
A customer sends questions

→

2 · Data
Monthly profile and evidence

→

3 · Logic
Rules match and draft answers

→

4 · Approval
Owner reviews and approves

→

5 · Outcome
Pack shared, every step logged

Nothing reaches the customer until the owner approves.

ESG Scope

11 SEDG Basic disclosures in the MVP

Environment

- **E1.1** Direct emissions
- **E1.2** Electricity emissions
- **E2.1** Energy consumption
- **E3.1** Water withdrawn
- **E4.1** Waste management

Social

- **S1.1** Labour incidents
- **S4.1** Health & safety

Governance

- **G1.1** Company directors
- **G2.1** Policies in place
- **G3.1** Financial reporting
- **G4.1** Corruption incidents

Each one is labelled **auto**, **declared**, **estimated** or **missing**.

Human Control

Only the owner can approve and share

Owner
Manages data, approves, shares

Admin clerk
Prepares records and drafts

Customer
Views the approved pack only

- Original evidence never changes
- Approval freezes answers, factors and evidence
- Every action is recorded in the activity log

How We Build

Traceable numbers, AI only where it helps

Next.js
Live app, demo, OCR

→

FastAPI
Rules engine and OCR

→

Supabase
Database, private evidence

Emission factors

Grid **0.740** kg CO_2e/kWh

Diesel **2.662** · Petrol **2.340** kg CO_2e/L

Where AI helps

Gemini Vision reads uploaded bills

A person confirms every value; offline OCR fallback

Questions: bilingual rules, not AI

Orbyte Fit

Plugs into the hub, works for any SME

Uses the hub

Login, roles, approvals, activity log

Adds new value

First sustainability module, not an HR copy

Reusable

One profile for any supplier, any sector

Impact

Faster answers, trusted numbers

Days → 1 hour
per questionnaire (estimate)

Every number
backed by evidence or a declaration

11 of 16
SEDG Basic disclosures

SDG 8.3 SME growth · 8.2 Productivity · 8.4 Resource efficiency · 12.6 Reporting

Free readiness profile · pay per questionnaire · buyers fund supplier onboarding

Risks

Every risk has a human fallback

Risk	Fallback
Wrong SEDG match	Owner reviews every answer
Bill value typo	A person confirms; originals kept
Missing data	Labelled, never counted as complete
Privacy (PDPA)	Fictional data; OCR provider disclosed
Greenwashing	No certification claims; sources shown

Thank You

ESG Passport: get ready before your customer asks.

NEXT STEPS

- Map social and governance questions
- The other 5 SEDG Basic disclosures
- Orbyte Connect integration
